

Preparing Your Canvas

STEP 1: MARK THE OUTER BORDER

- Measure 2" in from the outside edge on each side and mark the canvas with a blue dot
- Put the blue marking pen in the "ditch" between 2 canvas threads and draw lines extending from the dots toward the corners; connect the lines to create a 6" box on the canvas.

STEP 2: DRAW THE SQUARES

- Using the tape measure and blue marking pen, divide and mark the 6" square into equally sized boxes.
- You should end up with 16 small boxes on your canvas, each measuring 1.5" square.
- Use the same method as described in step 1 to mark the lines on your canvas.

STEP 3: MOUNT YOUR CANVAS ON A STRETCHER BAR FRAME

- Using the brass tacks, attach the doodle canvas to your stretcher bar frame.
- Space the tacks approximately 1/2" - 1" apart all the way around the perimeter of the canvas.

Stitching Tips

- When working stitch samples on a doodle canvas, it's easier to tie off your threads if you stitch in the well.
- Leave 2 canvas threads unstitched around the perimeter of each 1.5" box so your stitches won't unravel when you cut your canvas to attach the samples to your FunSheet.
